Thank you for purchasing the Maha battery charger. Read these instructions carefully and thoroughly before operating this unit. IMPORTANT SAFETY INSTRUCTIONS. READ AND SAVE THESE INSTRUCTIONS.

GENERAL PRECAUTIONS

- Do not charge any other chemistry of battery cells in addition to NiCd and NiMH.
- When charging batteries, do not use batteries of different capacities or brands. Failure to do so may damage the batteries.
- Do not expose the unit to rain or moisture due to risk of fire.
- Do not operate the charger if it appears damaged in any way.
- Always place the battery cells with positive tip facing top. Incorrect polarity may cause fire or explosion.
- Always use the supplied AC adapter or cigarette lighter adapter (optional). The cigarette lighter adapter includes a fuse. CAUTION: for continued protection against risk of fire, replace only with the same type and rating of fuse.
- Do not allow the battery terminals to become shorted.
- To reduce the risk of damage to the AC power adapter, pull by connector rather than the cord when disconnecting.
- Use of an attachment not recommended by or sold by the battery charger manufacturer may result in a risk of fire, electric shock or injury to persons.
- When using the optional car kit, vehicle should never be started while the charger is in use. Damage to the charger could occur.

FEATURES & SPECIFICATIONS

- Rapid charge both rechargeable Nickel Cadmium (NiCd) and Nickel Metal Hydride (NiMH) AA / AAA size cylindrical battery cell.
- Conditions and rejuvenate NiCd and NiMH batteries to enhance performance.
- Microprocessor controlled rapid charge with automatic trickle charge.
- Two independent circuits, each capable of charging two batteries (AA /AAA)

5. When the green lights are shown, the batteries are ready for usage.

When using in a vehicle (Optional Car Kit Required)

Make sure your vehicle’s output voltage is between 9V to 15V, and is capable of supporting a 500mA current drain. If you have any concerns regarding this, refer to your vehicle’s owner’s manual.

1. Plug in the supplied cigarette lighter adapter into your vehicle’s cigarette lighter, without the charger attached. Verify that the green power LED on the cigarette lighter adapter is illuminated. If LED does not light, your vehicle may need to be running in order to energize the cigarette lighter, or the inline fuse may need to be replaced.
2. Connect the charger to the connector-end of the cigarette lighter adapter.
3. Follow step four and five on the section "When using at home / office".
